

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, October 2, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity: Light (34) new fires
 New large incidents: 0
 Large fires contained: 0
 Uncontained large fires:** 15
 Area Command teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 3

Nationally, there are 48 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Great Basin Area (PL 3)

New fires:	5
New large incidents:	0
Uncontained large fires:	7
Type 1 IMT's committed:	2

Range Two, Elko County. Twenty miles southeast of Elko, NV. Timber, brush and short grass. Active fire behavior with single tree torching, group torching and backing. Structures threatened. Evacuations, road, area and trail closures in effect.

Roosevelt, Bridger-Teton NF. IMT 1 (Demasters). Thirty-two miles south of Jackson, WY. Timber and brush. Minimal fire behavior. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Pole Creek, Uinta-Wasatch-Cache NF. IMT 1 (McGowan). IMT is also managing the Bald Mountain incident. Twelve miles northeast of Nephi, UT. Timber. Minimal fire behavior. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Bald Mountain, Uinta-Wasatch-Cache NF. Seven miles northeast of Mona, UT. Timber and brush. Minimal fire behavior. Structures and energy infrastructure threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Mirror Lake Complex, (2 fires), Uinta-Wasatch-Cache NF. Transfer of command from IMT 2 (Roide) back to the local unit occurred yesterday. Thirteen miles east of Kamas, UT. Timber, brush and light logging slash. Active fire behavior with short-range spotting, uphill runs and torching. Structures and energy infrastructure threatened. Road, area and trail closures in effect.

Marten Creek, Bridger-Teton NF. Thirteen miles east of Afton, WY. Timber and brush. Minimal fire behavior.

Predictive Service Discussion: Widespread wetting rainfall is expected across the Four Corner states, the Great Basin, and Wyoming, as the remnants of Rosa move northeast and are absorbed into a cold front moving east across the northern Great Plains. Low pressure off the California coast will begin to move onshore into southern California, increasing the shower activity there and across Nevada. By evening, showers will increase across the Great Lakes Region as moisture from the approaching front over the Plains begins to stream in from the West. The Southeast and Mid-Atlantic States will remain warm and dry under the high pressure ridge.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Grant West RX

Incident Summary: October 2nd 2004, a prescribed fire is planned in the Grant Grove Sub District of Kings Canyon National Park. This park has long been known for its active prescribed fire program and, since 1981, has been home to the Arrowhead Hotshots. The unit being burned this day has been burned several times before. The predominant tree in this unit is White Fir, a high-risk species, which had suffered a considerable die-off due to a Tussock Moth infestation. The unit has been prepped and hose-lays installed. Numerous snags along the line have been evaluated for firefighter safety and holding concerns. Some hazard trees were cut down or lined. One white fir snag about 146 feet tall and 12 feet inside the line was considered sound by experienced firefighters and is left standing. Torching brush and short trees during the test burn send embers into the top of the snag and within minutes smoke and then flames are observed. The snag has become a hazard and a holding concern and it is decided that it needs to be felled. Class C-fallers are called over to size-up the tree; Daniel Holmes, an Arrowhead Hotshot, is the swamper. Because of its lean, it is decided to drop it across the line and to move the hose-lay so that it can be suppressed as a spot fire. Holmes and another faller pass under the snag on the fireline as they walk over to assist in moving the hose-lay so that they can then cut the tree. Several firefighters see the top of the snag fall and yell. They start to run but the falling tree top hits Holmes on the head and he is knocked out. He never regains consciousness.

To that date, Daniel Holmes would be the 20th firefighter killed by a snag since 1960.

Discussion Points:

The morning began with a safety briefing and most of the firefighters confirm snag hazards emphasized several times.

- If you were giving your crew a briefing about hazard trees in **your** area, what are your emphasis points?

You and your crew are sizing up hazard trees in preparation for a prescribed burn in **your** area.

- What are the common high-risk species of trees there?
- Discuss how you will determine the soundness of trees.
- What are the common indicators that they have become unhealthy/unsafe?

Knowing when the top of this tree would fall is impossible. The top of the snag had only been burning for less than 2 hours. The winds had been light.

- Would you have considered this tree as hazardous as it really was?
- Knowing that the top of the tree might eventually fall, what will you do to be ready for it?

Though there were three experienced fallers paying attention to the burning snag during its size-up, once the firefighters transitioned to moving the hose-lay there was not a dedicated lookout assigned for that task.

- How will you and your crew manage the safety of all firefighters when you are in a similar transition situation?
- How can you better expect the unexpected after reading this tragic accident?

Arrowhead Hotshot Daniel Holmes – 2004
